Proposed Pollinator Habitat - Revision 2

Owner: Chris Menning
Address: 1140 12th Ave Green Bay, WI 54304
Changes: In this revision, the setback area has been expanded to include the leftmost side abutting the driveway belonging to the 1144/1146 property, adding 90 square feet to the setback, reducing the size of the pollinator habitat by as much. Queen Anne's Lace has been replaced with Aster.

Yard Description

This small front yard is approximately 536 square feet in area. Each side is flanked by a driveway; one is mine and the other belongs to my neighbor. 174 square feet of this will be a mulched setback area. 74 square feet of this will be prairie dropseed grass. The remaining 288 feet is planned to become the pollinator habitat sown with wild native plants.

At the front of the yard, along the public sidewalk, I have replaced the grass with wood mulch to a distance of three feet from the sidewalk to the "Edgestone" brick edging. The edging smoothly curves to 90 degrees as it runs parallel to the private walk leading to my front stoop and home entrance.

Setback Description

Total area: 174 square feet (front: 3' x 28', left side: 30'x3')

The 3-foot-deep setback area runs along the front and left side of the front yard. This area is covered in wood mulch. Edging consisting of tan-colored "Edgestone" brick separates the setback area from the planned pollinator habitat.

The ordinance states in Section 24-84 (g)(2)(d)(2)(iv):

> The setback area **should be** regularly cut turf grass, **garden beds**, trees, shrubs, mulch, wood chips, landscape stone, or other approved material.

(Bold added for emphasis)

In the front mulched beds that run parallel to the public sidewalk, I have planted seeds for the following flowers (spaced 22" apart).

- Coneflower
- Black-Eyed Susan
- Bee Balm
- Aster

This mulched and neatly-spaced flower bed within the front three feet of the setback is intended to comply with Section 24-84 (g)(2)(d)(2) **allowing for "garden beds**… mulch, wood chips, landscape stone."

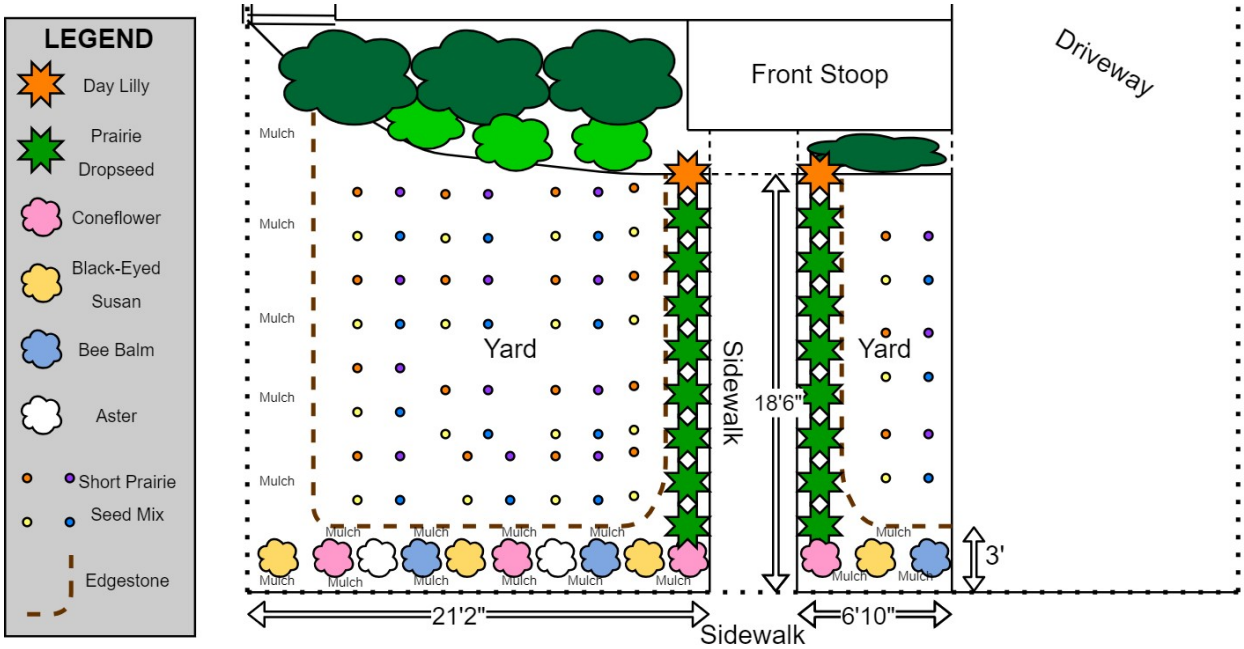
Entrance Sidewalk Bed Description

Total area: 74 square feet (2' x 18'6")
On either side of the sidewalk leading to the entrance of the house, I have planted Prairie Dropseed between the sidewalk and the edging. This is planted without mulch and is intended to fill with Dropseed completely.

Pollinator Habitat Description

Total area: 288 square feet (18'6"' x 15'6")
In what is currently the lawn area surrounded by edging and driveways, I plan to overseed a mix called "Prairie Seed Mix for Medium Soils" from Prairie Nursery. The following table lists the common name, scientific name, and height range at maturity for each plant contained in the mix.

Common name	Species	Mature height
Pale Purple Coneflower	Echinacea pallida	36"-60"
Purple Coneflower	Echinacea purpúrea	24"-36"
Black eyed Susan	Rudbeckia hirta	24"-36"
Nodding Pink Onion	Allium cernuum	12"-24"
Lavender hyssop	Agastache foeniculum	24"-48"
Shootingstar	Dodecatheon meadia	12"-24"
Sky blue aster	Aster azureus	24"-36"
Smooth aster	Aster laevis	24"-48"
Rattlesnake Master	Eryngium yuccifolium	36"-60"
Canada milk vetch	Astragalus canadensis	24"-36"
Lance leaf coreopsis	Coreopsis lanceolata	12"-24"
White prairie clover	Dalea candida	12"-24"
Purple prairie clover	Dalea purpurea	12"-24"
Prairie Blazing Star	Liatris pycnostachya	36"-50"
Wild Quinine	Parthenium integrifolium	18"
Smooth Penstemon	Penstemon digitalis	24"-36"
Brown Eyed Susan	Rudbeckia triloba	24"-60"
Golden Alexanders	Zizia aurea	12"-24"



In the above scale drawing, the brown dotted line signifies the tan “Edgestone” brick edging barrier separating the 3-foot-deep mulched setback flower bed and dropseed from the yard area that will receive the Short Prairie seed mix.

The dotted lines on either side of the diagram represent the property line boundaries. The leftmost dotted line represents the edge of the gravel driveway belonging to my neighbors in the 1144/1146 duplex. The rightmost dotted line represents the edge of the concrete driveway belonging to my neighbors at #1136, which abuts my own driveway.

The following image is a marketing photo of the “Bullet” style Tan Edgestone brick edging from Home Depot that separates the pollinator habitat from the front setback flower beds.

The next image illustrates the property boundaries as represented on BrownDog.com, including my neighbors in the adjoining lots.
